NorthEast Logistics Systems, LLC

GIS for RAILROADS

At NorthEast Logistics Systems, LLC (NELS) our GIS and Rail Subject Matter Experts possess particular strength in understanding the underlying data and systems supporting freight and passenger railroad operations. We have an extensive library of existing data layers covering the entire North American Rail Network and the tools necessary to develop and deploy GIS solutions.

NELS has the tools, expertise and experience to jump start or augment your GIS program. We are experienced in Google and ESRI-based solutions and have the technical tools — including GIS Server, Network Analyst, Web Services and Web Deployment Capabilities from our own data center or from yours. Coupled with our vast array of existing rail industry network and infrastructure data layers, NELS is the obvious choice for railroads, planning agencies and AEC companies. Give us a call and see how NELS can be of benefit to your organization.
