NorthEast Logistics Systems, LLC

GPS-GIS DATA TRANSFORMATION AND INTEGRATION SERVICES

NorthEast Logistics Systems, LLC (NELS) blends expertise in rail transportation network analysis with proprietary GPS and GIS analytical tools. Our GIS Analysts have extensive experience in integrating GIS and real-time GPS data. NELS creates customized solutions through the integration of GPS location data and GIS data tailored to the client's business need. The end result is a comprehensive data set that provides visualization of the client's operations. NELS manages this data and assists in establishing a standardized secure data feed that will allow end users either direct web based access to the data or access through standardized reports. With our GPS data collection and management tools and expertise, our clients have the ability to optimize routes, assess route capacity and improve network performance.

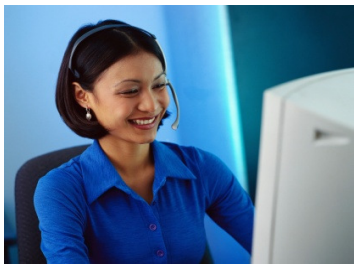

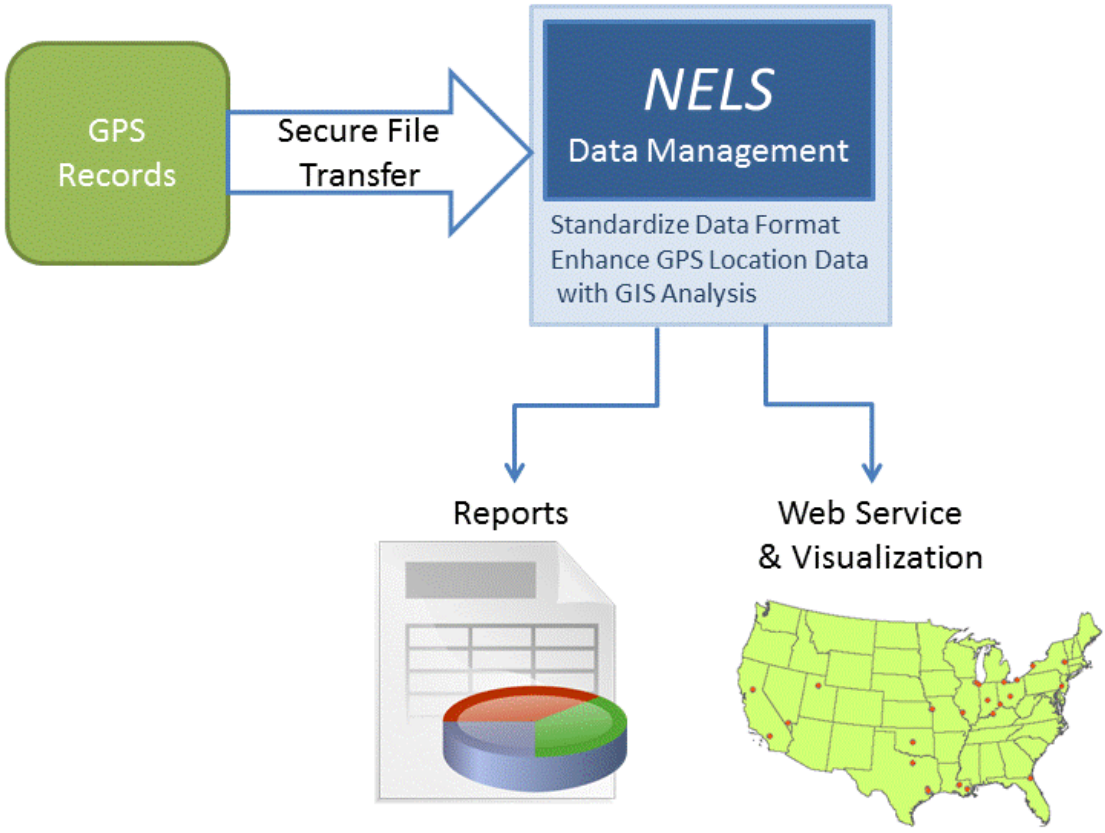

Our in-house staff is highly experienced applying ESRI ArcGIS to the railroad transportation sector. We blend our rail expertise with the power of COTS GPS technology with our data visualization tools and analytical tools to meet your firm's exacting requirements. Want to take your GPS program to the next level? Give NELS a call.
