NorthEast Logistics Systems, LLC

RAIL NETWORK DEMAND FORECASTING & INFRASTRUCTURE ASSESSMENT

NorthEast Logistics Systems (NELS) expansive geo-spatial database of the North American transportation network and proprietary software tools, enables comprehensive analyses of existing and projected traffic flows on both freight and passenger rail networks.

Our network analysis tools and visualization capabilities support line capacity and growth assessments, current and planned infrastructure requirements, schedule optimization and routing alternatives.

Through our advanced GIS analysis, NELS' clients have the ability to identify future constraints on current freight and passenger rail network routes and conduct the statistical analysis required to support capital expenditures or to aid in grant preparation..

All estimates of trains per day shown are based on 5-days per week service.

*NJTransit currently developing ridership forecasts.

Our in-house staff members are highly experienced applying ESRI ArcGIS to the railroad transportation sector. We blend our rail expertise with the power of data visualization tools to meet your firm's exacting requirements. **Contact us at 617-418-3570 or info@nelogsys.com.**
